UNION STOCK YARDS.

It is no exaggeration to say that the Union Stock Yards at Toronto Junction challenge comparison with any other on the continent ,not even excepting Chicago. The Chicago yards may be larger, but they are inferior

Mr. W. W. Hodgson, the superintend-ent, designed the Union Stock Yards from the time the first sod was turned, and his plans have been followed into the future, and not a month passes that something is not done to that

There is nothing more certain than that the Union Stock Yards are bound to grow. The directors believe this implicitly, and have provided for expansion. The area already occupied comprises thirty-two acres. Besides this, ten acres have been set apart for the horse exchange, and 70 acres lie to the north. These 79 acres are for kindred industries, and before many months a large abattoir and packing house will be established, with others

The Exchange Building is the first object that attracts the eye. It's a handsome red brick structure, contains forty-one rooms, and is as useful as it ing-room. Bank offices and business offices cover the ground floor, and
